been set for the trial. MEETING COMMUNITY RELATIONS COUNCIL SET NEXT TUESDAY

The Hancock County Community Relations Council will meet on Tuesday evening, June 29, 1965, at 8 o'clock P. M., in the Parish Hall of Our Lady of the Gulf Catholic Church. At this meeting a constitution and by-laws of the or-ganization will be adopted and officers will be elected. Copy of the proposed constitution and by-laws have been placed in the hands of all persons who have indicated an interest in the Council. County officials and officials of Bay St. Louis and Waveland along with other prominent persons in Hancock County have attended the

past three organizational meetings. The purpose of the Hancock County Community Relations Council is primarily to open a channel of communications between members of the White and Negro communities and thereby provide a forum for discussion of problems of community interest. In addition the Council hopes to carry on an educational program directed to ward creating a climate of opinion favorable to an expansion of opportunity for all the people of cultural areas based on freedom from discrimination on grounds of race, religion or national origin. This purpose will be implement-

ed through cooperation with local. state, regional and national agencies sharing these objectives. The educational and action programs of this organization will be directed toward removing causes of intergroup tension and promot-

ing intergroup understanding. All persons interested in the objectives of this group are invited to attend the meeting to be held on Tuesday evening.

BEEN SHOPPING LATELY?

take Dad along! Before you go shopping for a Church, make sure you know what you're looking for. For a Church isn't a theatre to provide entertainment, nor a club to fortify one's social position, nor a foundation to channel our charities.

A Church is a SCHOOL that trains whole families in spiritual perception.

It is a FACTORY that makes earnest Christians. They're in evidence all

A Church is a TOWER, giving a glimpse of life's horizons, far beyond the petty problems of each day.

A Church is a WORK-SHOP where one volunteers his talents in the most chal-

lenging tasks that confront humanity.

And, of course, a Church is HOME — the place where we're appreciated, where we're one of the Family!

But it doesn't hurt to admit that in one respect our churches are like our stores: There wouldn't be one in town if we didn't need what they offer!

The Church is the greatest factor on earth for the building of character and good citizenship. It is a store-house of spiritual values. Without a strong Church, neither democracy nor civilization can survive. There four sound reasons why every are four sound reasons we every person should attend services regu-larly and support the Church. They are: (1) For his own sake, (2) For his children's sake, (3) For the sain of his community and nistics. (4) For the sake of the Church itself, which nearly his worst and material support.

Resembling a medieval castle or Egyptian pyramid is the base of a huge rocket test stand being built at the National Aeronautics and Space Administration's Mississippi Test Facility. When completed next year, the superstructure an i overhead crane of the dual position stand will tower 426 feet, over 40 stories. Night activity is reflected in the man-made canal by which special barges will deliver S-IC booster stages and fuels directly to the stand. Secured in the stand, the stages, 138 feet tall, and their liquid oxygen-kerosene engines capable of producing 160 million horsepower, will be fully tested before shipment to Cape Kennedy, Florida to become part of the Saturn V/Apollo space exploration vehicles. Other test stands at MTF, a division of NASA's Marshall Space Flight Center, are being built to test S-II second stages of the Saturn V.

WHY

WE PUT

If you're a Mississippi Power Company customer, you've that your electric bill came in an envelope this wonth We thought you might like to know why we made this change Pirst, envelope billing keeps your bill your own personal affair, adding a touch of privacy we believe you'll appreciate.

Second, envelope billing enables us to include an addressed return envelope, making it easier for you to remit by mail, if you choose.

Third, envelope billing makes it possible to provide you with a new service—a monthistensymaletter giving helpful hints on using electricity, recipes, and up-to-date information on customer services. Envelope billing is another step in our coatianing program to bring you the

American ingenuity which has produced the hydrogen bomb, has had a man floating in space and which is soon to put a man on the moon has never solved many of the mysteries of nature. It has not, for example, been able to produce a palatable, wholesome synthetic cow's milk.

Today in Mississippi the milk you drink was produced by what we call the "Electrified Cow" While we have no substitute for milk, we do have a modern, efficient and economical substitute for much of the work which previously went into making it available to the public. This does not mean the life of a dairyman is a life of ease — he must still work seven days a week — but it does mean the can produce more milk with less people on the payroll in an ever-dwindling farm labor

Electric power which helps grad, pump, cool, convey feed and milk the cow plays a vital role the gills of milk you drink. It has played a vital role in the volume of milk produced and has a state difference in profit and loss for the dairyman.

Legislation of Electric Power Associations in Mississippi there were less than 50 and the state. Tooley there are 2.362, which had cash receipts of \$35,306,000 last last scale could ense without the electric power supplied by their locally owned Electric

properly mixed with corn slage that would yield 50 to 100 bushels per acre, fed as a complete ration, did a good job of fattening yearling steers. The feed cost per 100 pounds of gain was \$10.34 for urea fed steers and \$12.40 when cotton-seed meal was used as the source of protein. CAUTION. There is danger of caution. There is danger of poisoning or possibly killing individual cattle unless ures is thoroughly mixed with the sliage. Method used by the researchers was to spread the correct smount of urea uniformly over the top of each load prior to unloading. The unloading process and action of the auger and blowers save a uni-A good many people have reported to my office about formatio
